

Determine a solution to each of the following expressions by drawing a picture or diagram. **Be sure to write the question in words so that you understand what the problem is asking you to do.**

1. $\frac{7}{10} \div \frac{3}{10}$

2. $\frac{3}{4} \div \frac{1}{2}$

3. $6 \div \frac{3}{4}$

4. $\frac{5}{6} \div \frac{1}{3}$

CHALLENGE

5. NOTE: This question is very different from question #2. Look at the problem below. It is a much more simple problem but it proves that solutions to #2 and #5 are not the same. Example: $10 \div 5 = 2$ but $5 \div 10 = \frac{5}{10}$ or $\frac{1}{2}$

$$\frac{1}{2} \div \frac{3}{4}$$
